Our Physicians

Our Clinical and Research faculty members are dedicated to the highest standards of patient health care. Their commitment to the patient motivates every aspect of our efforts, from the bedside, to the classroom and to the research lab. The Department of Orthopaedics and Rehabilitation continues to build on its reputation of excellence in Clinical and Basic Science Research that was established by the department's first chairman, William F. Enneking, MD.

Our Physicians are organized by several specialties. Each of our doctors is dedicated to providing the highest standards of patient health care available to their profession.

To discover more information about our physicians, please choose a Specialty from the menu on the left.
