Letter from the Chair

Alumni and Friends,

Greetings from the Department of Orthopaedics and Rehabilitation. It is my pleasure to present this newsletter that introduces new faculty, residents and fellows. We also say goodbye and wish the best to our graduating residents and fellows. We were pleased to host Dr. Kevin Bozic, a leader in value-based healthcare. He gave outstanding talks and stimulated excellent dialogue on this topic.

The division of Physical Medicine and Rehabilitation continues to expand. The goal is for the PMR faculty group to grow to a level where all subspecialties of Physical Medicine and Rehabilitation are represented allowing for a comprehensive rehabilitation program. We are planning to start a PMR residency program in 2021. The division is headed toward becoming an independent department in the near future.

Stay tuned for exciting updates and a new affiliation for our Pediatric Orthopedic Division this next year. Please consider joining the Enneking Alumni Society (open to all UF Orthopedic Alumni, residents and all fellows). We look forward to seeing all alumni back for the Enneking Society meeting or anytime you are in Gainesville!

Mark T. Scarborough, MD
 Chair, UF Department of Orthopaedics and Rehabilitation

Welcome New Faculty

Andrew Dubin, MD
Professor
Physical Medicine & Rehabilitation

Thomas Krupko, MD
Assistant Professor
Trauma Surgery

Carolyn Geis, MD
Associate Professor
Physical Medicine & Rehabilitation

Tony Merendino, DPM
Assistant Professor
Foot & Ankle

Stephanie Innow, MD
Assistant Professor
Pediatric Orthopaedics

Ryan Roach, MD
Assistant Professor
Orthopaedic Sports Surgery

Celebrating Distinction

The University of Florida Celebrating Distinction ceremony is in recognition of UF Health faculty members who recently have been named to an endowed professorship or chair. Appointment to a professorship or chair is one of the highest honors a college can bestow on a faculty member and is reserved for scholars of national and international acclaim. This year, we had three faculty members recognized:

Laurel Blakemore, MD

Shriners Professorship in Pediatric Orthopaedics

Established in 2019, this gift supports a professor in the UF department of orthopaedics and rehabilitation specializing in pediatric orthopaedics, including clinical care, education and research. Since opening the doors of its first hospital in Shreveport, Louisiana in 1922, Shriners Hospitals for Children has grown into a pediatric specialty health care system with hospitals in the U.S., Canada and Mexico.

Kevin Farmer, MD

Peter Indelicato, M.D., Professorship in Orthopaedic and Sports Medicine

The UF Health Orthopaedics and Sports Medicine Institute established this fund in 2011 to enable educators to pursue projects at the forefront of orthopaedics and sports medicine at the University of Florida in honor of Peter Indelicato, MD. Dr. Indelicato served as a sports medicine physician for members of the Los Angeles Rams, Lakers, Dodgers and Kings and was the associate team physician for the Miami Dolphins. The former chief of sports medicine for the UF Department of Orthopaedics and Rehabilitation, Dr. Indelicato retired as the head team physician for the UF Athletic Association in 2011, a position he held since 1977.

Kevin R. Vincent, MD

John H. and Mary Lou Dasburg Chair in Physical Medicine and Rehabilitation

This gift was established by John and Mary Lou Dasburg in recognition of the excellent care provided by faculty and staff within the division of physical medicine and rehabilitation at the UF College of Medicine. Mr. Dasburg holds degrees in engineering, business and law, and Mrs. Dasburg holds a degree in law. The Dasburgs have the distinction of being the only couple who have created four endowed chairs in four different UF colleges: Engineering, Business, Law and Medicine.

2019-2020 Incoming Fellows

JOINTS
Florian Dibra, MD
University of Florida

JOINTS

2019 Residents and Fellows Graduation

2019 Visiting Professor

Michael McKee, MD Professor and Chair at the University of Arizona, was invited by our Chief Residents to be our annual Visiting Professor April 29-30, 2019. During his visit, Dr. McKee gave several lectures and led a cadaver lab with the residents teaching various procedures and exposures.

Edward Haupt, MD Recognized with Resident Educator Award

Dr. Edward Haupt received the 2019 University of Florida, College of Medicine's Society of Teaching Scholars Outstanding Resident Educator Award for the Department of Orthopaedics and Rehabilitation. This award recognizes Dr. Haupt's excellence in teaching colleagues and medical students.

American Academy of Orthopaedic Surgeons (AAOS) University of Florida 2019 Alumni Reception

March 15, 2019
Las Vegas, Nevada

Internationally Renowned Health Policy and Value-Based Care Expert Visits UF Health

Kevin Bozic, MD, MBA visited UF Health as a Visiting Professor and guest of the Arthroplasty division on May 16-17, 2019. He shared his vision for how the delivery of musculoskeletal care, as well as training healthcare leaders for tomorrow, are being transformed in the evolving healthcare world. Dr. Bozic, the inaugural Chairman of the Department of Surgery and Perioperative Services at the University of Texas at Austin, is a world-renowned thought leader on innovative care delivery, particularly in incorporating value-based principles in musculoskeletal health care.

Dr. Bozic's visit kicked off with a spirited discussion in a journal-club format for the residents and fellows on the principles of value-based care, as well as ways to understand and interpret the medical literature. He then delivered an orthopaedic Grand Rounds on "The Future of Educating Orthopaedic Surgeons in New Healthcare Delivery Models," speaking to the importance of leadership training for orthopaedic surgeons, among other key points.

The next morning, Dr. Bozic delivered an interactive and energetic Surgical Safety Symposium talk to the combined perioperative services groups on the "Lessons Learned in the Transition to Value-Based Care" reflecting on the opportunities and challenges experienced by his group while embracing new health care delivery models. Following that talk, the orthopaedic department had the opportunity to enjoy a roundtable discussion with UFHealth leadership, including senior vice president David R. Nelson, MD, on how health systems can adapt-- particularly with respect to musculoskeletal care--in the new era of value based purchasing of health care and physician services, right-sizing care, and patient-centered personalized medicine.

In his current role, Dr. Bozic has been tasked with building a transformative surgical health system in Austin, the first American top-40 research university to open a medical school in over 40 years. The central tenet that has defined his time at Austin is building "value." This value has been achieved through improving outcomes that are meaningful to patients, while reducing costs, by improving data transparency for care providers and realigning practice and payment models to value high-yield, evidence-based interventions.

Physician leaders from UF, including several members of the department of Orthopaedics, will be visiting Dr. Bozic's Musculoskeletal Institute in December to watch these principles in action and understand how these ideas can be translated to innovate care delivery here in Florida.
